Innuos ZENith Special Edition

Building on the award-winning ZENith Music Server, the new ZENith Special Edition (SE) takes your music to new heights.

The ZENith SE picks up the trademark PRaT (Pace, Rhythm and Timing) and neutrality of the ZENith and adds more body to the music, improving the depth and height of the soundstage. Music becomes more natural, involving and exciting.

A number of improvements were added for this exclusive 100 units Special Edition:

- New oversize, custom-wound audiophile toroidal transformer with 3 independent outputs for each Linear Power Supply
- New Triple-Linear power supply designed by Sean Jacobs using high-end Mundorf caps
- Three anti-vibration feet with asymmetrical positioning to better isolate vibration without affecting dynamics
- Audiophile-grade silver-coated and shielded cabling for internal connections, hand-soldered directly to circuits to lower impedance from connectors
- Improved EMI protection for the internal components
